

The screenshot displays the Salesforce Setup interface for managing Static Resources. The left-hand navigation pane shows the 'Setup' menu with 'Static Resources' selected. The main content area is titled 'Static Resource' and contains the 'Static Resource Edit' form. The form includes the following fields:

- Name:** StatusImages
- Description:** (Empty text box)
- File:** Choose File StatusImage.zip.zip
- Cache Control:** Private (with a dropdown arrow and an information icon)

At the top of the form, there are 'Save' and 'Cancel' buttons. A legend indicates that red bars next to the Name, Description, File, and Cache Control labels denote required information. The bottom of the form also features 'Save' and 'Cancel' buttons. The top of the page shows the Salesforce navigation bar with 'Setup', 'Home', and 'Object Manager' tabs, and a search bar.

The screenshot shows the Salesforce Setup interface. On the left, the navigation menu includes 'Setup', 'Home', and 'Object Manager'. The main content area is titled 'Static Resources' and shows a list of static resources. The resource 'StatusImages' is selected, and its details are displayed in a table. The table includes fields for Name, Namespace Prefix, Description, MIME Type, Cache Control, Size, View file, Created By, and Last Modified By. The user is logged in as 'Gomathi P. Gomathi'.

Static Resource Detail	
Name	StatusImages
Namespace Prefix	
Description	
MIME Type	application/zip
Cache Control	Private
Size	57,029 bytes
	View file

Record Types

Specify the type of information that the custom field will contain.

Data Type

☐ None Selected

Select one of the data types below:

☐ Auto Number

A system-generated sequence number that uses a display format you define. The number is automatically incremented for each new record.

☒ Formula

A read-only field that derives its value from a formula expression you define. The formula field is updated when any of the source fields change.

☐ Roll-Up Summary 1

A read-only field that displays the sum, minimum, or maximum value of a field in a related list or the record count of all records listed in a related list.

☐ Lookup Relationship

Creates a relationship that links this object to another object. The relationship field allows users to click on a lookup icon to select a value from a popup list. The other object is the source of the values in the list.

☐ Master-Detail Relationship

Creates a special type of parent-child relationship between this object (the child, or "detail") and another object (the parent, or "master") where:

- The relationship field is required on all detail records.
- The ownership and sharing of a detail record are determined by the master record.
- When a user deletes the master record, all detail records are deleted.
- You can create rollup summary fields on the master record to summarize the detail records.

The relationship field allows users to click on a lookup icon to select a value from a popup list. The master object is the source of the values in the list.

☐ Checkbox

☐ Currency

☐ Date

☐ Date/Time

☐ Number

☐ Percent

☒ Text

☐ Time

Select one of the data types below.

Calculate a boolean value.
Example: `TODAY() > CloseDate`

Calculate a dollar or other currency amount and automatically format the field as a currency amount.
Example: `Gross Margin = Amount - Cost__c`

Calculate a date, for example, by adding or subtracting days to other dates.
Example: `Reminder Date = CloseDate - 7`

Calculate a date/time, for example, by adding a number of hours or days to another date/time.
Example: `Next = NOW() + 1`

Calculate a numeric value.
Example: `Fahrenheit = 1.8 * Celsius__c + 32`

Calculate a percent and automatically add the percent sign to the number.
Example: `Discount = (Amount - Discounted_Amount__c) / Amount`

Create a text string, for example, by concatenating other text fields.
Example: `Full Name = LastName & ', ' & FirstName`

Calculate a time, for example, by adding a number of hours to another time.
Example: `Next = TIMEVALUE(NOW()) + 1`
